

WHAT IF YOU LIST YOUR PRODUCTS IN INDALO?

Take a step closer to better air quality by including your materials in our software!

List your products for free in the INDALO database

INDALO is an innovative indoor air simulation software, the only one on the market. It helps building designers to make the right choices in terms of materials and ventilation systems to provide good air quality, depending on:

- materials used,
- HVAC systems,
- room occupancy,
- outdoor air pollution.

INDALO thus influences the designer's choices and positions itself as a material specifier.

Why should you list your products into INDALO?

Because we are all becoming more and more concerned about indoor air quality, building designers are seeking to use virtuous materials for occupants health and quality of life.

By integrating your products into our software database, you will gain visibility with design offices and building consultancy company.

How to become partners and list your products?

This partnership is free and you can list the materials of your choice.

For this, we need the pollutant emission reports of your materials giving their concentration in $\mu\text{g}/\text{m}^3$ or in $\mu\text{g}/(\text{m}^2 \cdot \text{h})$.

They trust us...

... what if you were the next one ?

You are a manufacturer and you would like to become a partner? Contact us!

Email: laura@octopuslab.fr - Phone: +33 (0)3 74 09 63 39

As mentioned in our partnership agreement, your data will remain strictly confidential. Only your products references will be visible to INDALO users.
